

25 YEAR RE-REVIEW

SECRET

Deputy Director of Training

16 July 1963

Chief, Intelligence School

Unclassified Training Program for NPIC

1. The attached staff study of the NPIC Unclassified Training Program represents a joint effort by those in the Intelligence Production faculty who were directly involved in the program.

2. I agree generally with the study's analysis of the program, and I would endorse the conclusions. I would not endorse Recommendation a. without giving [] a chance to present the NPIC point of view.

25X1

3. Recommendation b. and c. are sound in concept, but implementation of them would involve additional manpower and money, the complete cooperation and support of the Office of Personnel, and - probably - directive authority at the Deputy Director level.

4. I suggest that in our reappraisal of the NPIC program at the end of July we confine our discussion to those parts of the staff study that are directly related to the NPIC program.

5. I feel, however, that Recommendations b. and c. have enough merit to warrant further discussion and exploration. The Intelligence School could take the initiative here if so requested by the Director of Training.
